

K-LOVE is very important to me and I don't want it taken off the air. I am able to listen to K-LOVE everywhere I go in my local community. It is the only station I listen to. I know that it would have a big impact on people in my community because I can see the support people have for K-LOVE just by seeing bumper stickers on cars. I believe that we need this station because it is something that the entire family can listen to and be a positive impact on the community. We need a station that provides encouraging music especially for our children.
